Note.

THE accompanying list of books—incomplete as it is and open to much revision—is published under the authority of the United Service Institution of India, in the hope that it may prove of service to those whose duty or pleasure calls them to refer to such a list. It forms but a small section of a bibliography of English military literature, now in the course of preparation, the first volume of which, dealing with technical works printed up to 1642, has already appeared.

525376

C —

It is obvious that the following list must be far from representing the total number of books published on the subject. Many omissions, and these important ones, will doubtless be noticed. But such lapses are due not always to a book failing to come under my notice, but frequently to the fact that the title is not indicative of military contents. Many of the items are, perhaps, of little historical value, but in hands which know how to use them, even from those which appear to be the most worthless, something may be gleaned.

All books that the compiler has been able to examine himself have been treated bibliographically and are marked with an asterisk. The accuracy of the titles or dates of the others given cannot be answered for, but there is strong evidence to show that such books do or did exist.

With one or two exceptions, all books marked with a preliminary* are to be found in the Library of the United Service Institute.

Any corrections or additions that may occur to the reader in glancing through the list will be gratefully received.
